One of the major problems we have to face is that of unemployment. It is a big problem, a human problem, which we cannot ignore. Yet, in looking at it, it has to be remembered that merely giving of occupation to a large number of people does not ultimately increase employment or lessen unemployment. Employment comes from ever and more effective means of wealth production. The whole experience and history of the past shows that it comes through the growth of technological methods. Do not imagine that we can effectively deal with the problem of unemployment without technological progress. We cannot. Every country which boasts of full employment today is a technologically advanced country. Every country which is not technologically advanced has unemployment or under employment. Therefore, India is to advance, she must advance in science and technology. If we remedy that backwardness, we create not only wealth but also employment.
